Spray Equipment Guide Louisville - Colorado - USA

Superior Spray Systems From C.A. Technologies

C.A.T. AAA Configurations

The C.A.Technologies 14:1 Air Assist Airless Pump can now be supplied with either the Cougar or the Bobcat AAA spray guns. The Cougar outfits will come standard with 3/16" fluid hose and 1/4" air hose (53-402A) and be designated by the part # OC14. The Bobcat outfits feature the new lightweight ergonomic design with ultra light trigger pull. This outfit will come standard with the new 1/8" fluid hose and 1/4" air hose (53-404A) and be designated by the part # OB14.

CAT-X

CAT-EXtreme (HVLP / Pressure Reduced)

C.A.Technologies is proud to introduce our new CAT-X professional grade spray gun. The CAT-X provides extreme atomization, handle ergonomics, and fluid delivery superior to all the competitive guns on the market today. The CAT-X includes the HVLP air cap and the pressure reduced air cap to meet all the codes and regulations throughout the United States. The CAT-X comes in five distinctive handle designs, allowing you to customize your finishing experience.

CPRCAT Pressure Reduced

The CPR spray guns from CAT combine the transfer efficiency of HVLP with the speed and finish quality of conventional air spray. The CPR guns are available in both the pressure and gravity versions and include the new CPR air cap and the HVLP air cap, along with 3 different needle and nozzle sizes, multipurpose wrench, nozzle wrench, cleaning brush and mini regulator. These kits will also be available with your standard pressure or gravity cups or the more popular 3M PPS.

The Techline TJR is an economically priced gravity feed mini gun for use with a range of coatings from top coats to stains. This is great for all your touch up needs.

The J100H is our low CFM gravity feed spray gun. The 21-1090 air cap only uses 6 CFM, which enables the Jaguar 100H to be operated with a 2 HP compressor. This setup is designed for use with a low air consumption compressor.

The FE-Line LCFM HVLP is our low CFM lightweight ergonomic spray gun. The 21-1090 air cap only uses 6 CFM, which enables the FE-Line LCFM to be operated with a 2 HP compressor. This setup is designed for use with a low air consumption compressor.

Tip size may be changed based on the user's speed of application For best results please use the recommended air and fluid pressures listed

- Available in gravity and pressure kits
- Stainless Steel Fluid Passages
- Patented 12 point atomization
- Includes 3 needle & nozzle sizes
- Includes HVLP and pressure reduced air caps
- Available with 3M PPS pressure cup system

H2O-CPR

H2O-Air Assist Airless

CAT is pleased to announce that our new waterborne equipment is available. We have labeled the equipment for this application so customers will not confuse the solvent based and water based units in their shops. The H2O AAA units help reduce the sheering of materials, eliminating many of the problems associated with spraying waterborne coatings.

Pump Designation:

Bobcat Outfits H2O-OB14-C5-12-XXX-F

H2O-OB14-W5-12-XXX-F

Cougar Outfits H2O-OC14-C5-12-XXX-F

H2O-OC14-W5-12-XXX-F

H2O AAA outfits will include the following

- Pre-atomizing fine finish opti-tip (36-XXX-F)
- 100 Mesh gun handle filter
- 1/2" Material pick-up tube
- 3/16" Fluid hose with stainless steel couplings

consumption (11.5 @ 50 psi) and high CFM output.

- Larger fluid passages

H2O-Air Blast Quick Dryer

H2O Air Blast Quick Dryer: Speeds drying time of waterborne coatings while reducing micro bubbles. 54-540 Outfit - Includes 2 air blast guns, 54-541 Gun Only - Air Blast Guns can be hand held adjustable stand (height to 84", width to 34"). or mounted on stand. Variable air flow control with low CFM

Cups and Tanks
